PROFESSIONAL SUMMARY

Full-Stack & Platform Engineer with over 3 years of experience architecting scalable multi-tenant SaaS platforms, reactive web applications, cloud infrastructure, and robust backend APIs. Recognized as an **Upwork Top Rated Plus** developer (top 3% of global talent). Expertise spans modern JavaScript/TypeScript frameworks (Vue.js, Nuxt, React, Next.js, Node.js), AWS Cloud Infrastructure (ECS Fargate, EC2/ECR, S3, CloudFront), Docker containerization, Hasura GraphQL, and MySQL/PostgreSQL databases.

TECHNICAL SKILLS

Frontend Stack:	Vue.js · Nuxt 3 · React · Next.js · HTML5/CSS3 · Tailwind CSS
Backend & APIs:	Node.js · Express · Hasura GraphQL · Golang · RESTful APIs · Microservices
AWS & DevOps:	ECS Fargate · EC2/ECR · S3 & CloudFront · RDS MySQL · ALB · Docker · GitHub Actions
Databases & Arch:	PostgreSQL · MySQL · Multi-Tenant Architecture · Distributed Systems · Git

WORK EXPERIENCE

Full-Stack & Platform Engineer | Freelance (Upwork & Independent) — 2024 – Present

- Earned **Upwork Top Rated Plus** status by consistently delivering enterprise-grade SaaS and full-stack software solutions for international clients.

Featured Project: Omni V2: Multi-Tenant SaaS & Browser IDE Platform

🌐 Platform (omni00.com) · 🏢 Tenant Demo · ⚡ API · 💻 Cloud IDE Manager

- Architected and operated Omni V2, a modular multi-tenant product shell enabling tenants to create, edit, and publish web applications on demand.
- **AWS Cloud Infrastructure:** Built AWS setup utilizing Application Load Balancer (ALB), ECS Fargate API containers, S3/CloudFront frontend delivery, and RDS MySQL database clusters.
- **Eclipse Theia IDE Integration:** Built an EC2/ECR container workspace manager that spawns isolated Docker browser environments with auto-stop on idle and on-demand restart.
- **Multi-Tenancy & Published Runtimes:** Implemented subdomain routing, parent/child instance models, master + per-tenant database isolation, and separate published Next.js app runtimes (`/published-apps/...`).
- **Modular CI/CD & Developer Tooling:** Automated GitHub Actions pipelines with core-sealed security, allowing external contractors to bind-mount modules without core repo write access.

WORK EXPERIENCE (CONTINUED)

Full-Stack / Frontend Developer | **Minab IT Solutions PLC** — Nov 2023 – Present

- Engineered modern web platforms and enterprise dashboards using Vue.js, Nuxt.js, Tailwind CSS, JavaScript, and GraphQL (Hasura), connecting to Node.js and Golang backend services.
- **Hahu Jobs** 🔗 hahu.jobs
  Engineered frontend interfaces for Ethiopia's primary job search and employment platform connecting job seekers with employers. Optimized UI responsiveness, application management flows, and cross-device performance using Vue.js, Nuxt, Tailwind CSS, and GraphQL.
- **Hahu Muya** 🔗 muya.hahu.jobs
  Contributed frontend architecture and API integration for technical and soft skills training capacity-building programs developed in partnership with international development organizations.
- **Sheger Gebeta Place Admin Dashboard** 🔗 shegergebeta.com
  Designed and built administration management tools for content curation, media upload pipelines, real-time analytics, and user access control.

EDUCATION

B.Sc. in Information Technology — Graduated: July 2023

Bahir Dar University, Bahir Dar, Ethiopia

- **Capstone Final Thesis:** *Chewata Social Media Web Application* (Grade: A+)

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Node with React: Fullstack Application Development**: Udemy (2024)
- **IBM Cybersecurity Analyst Professional Certificate**: Coursera / IBM (2022)
- **Full Stack & Mobile Application Development Training**: Minab IT Solutions / BIT Career Center (2023)

LANGUAGES

- **Amharic:** Native
- **English:** Advanced / Full Professional Proficiency
